

Construction Methods and Project Management (250731)

General Information

School	ETSECCPB
Departments	Departament d'Enginyeria Civil i Ambiental (DECA)
Credits	5.0 ECTS
Programs	MÀSTER UNIVERSITARI EN ENGINYERIA ESTRUCTURAL I DE LA CONSTRUCCIÓ (pla 2015)
Course	2024/25

Main teaching language at each group

- Group 10ES1 Spanish (Q1)
- Group 20EN1 English (Q1)

Faculty

Responsible Faculty: Jose Turmo Coderque

Faculty: Javier Pablo Ainchil Lavin, Eva Casacuberta Esplugas, Gonzalo Ramos Schneider, Jose Turmo Coderque

Objectives of Education

Subject to introduce the students to the knowledge of the market of public works focusing on the characteristics of the Spanish sector .

- Knowledge of the characteristics of the construction sector , their interrelationships and their complexity. - Getting to the terminology used in the project and construction work with the agents involved in construction and their interrelations. - Knowledge of the unique aspects of construction

Cycle of Project and Work Construction. Tendering of Public Works. Tendering of Private Works. Tendering and contracting mechanisms. Analysis of concessions. Execution of works constructions: Structures

Total hours of student work

		Hours	Percentage
Supervised Learning	Large group	25.5 h	56.67 %
	Medium group	9.75 h	21.67 %
	Laboratory classes	9.75 h	21.67 %
	Guided Activities	0.0 h	0.00 %
Self Study		80.0 h	

Contents

Unit 1

Analysis of project and construction agents
Practical work

Specific Objectives

Identify the main parts of the project and building agents and their functions
Developing a practical work that is the technical and economic of planning a real work

Unit 2

Bidding. Technical and economic planning

Specific Objectives

Knowing the different bidding strategies and to prepare an offer and a work plan.

Unit 3

Occupational risk prevention

Specific Objectives

Learn to manage health and safety in construction work.

Unit 4

Quality and Environmental Management

Specific Objectives

Learn to prepare a quality plan and work instructions and learn the basics of environmental management work

Unit 5

Management during execution

Specific Objectives

Learn the main tools available to the project manager for adequate technical and financial management of the work

Unit 7

Construction Methods

Specific Objectives

Learn the types of reconstruction methods for structures and geotechnical works

Teaching Methodology

There are two groups, one in Spanish and the other in English. The Spanish group is named like this because the teachers' communication will be mostly in Spanish. The communication of the teachers of the English group will be fundamentally in English. The subject consists of 3 hours a week of face-to-face classes in a classroom. The last hour, in general, both groups will merge to allow the development of the practical part and the joint work of both groups. The realization of several practical works is proposed. It is intended that the student develop their ability to work in multidisciplinary, multicultural and international environments. Student queries may be answered in Spanish, Catalan or English. The practical work and the exams can be answered in Spanish, Catalan or English. Support material is used through the virtual campus: content, statement of work and bibliography. The material can be in Spanish, Catalan and English.

Although most of the sessions will be given in the language indicated, sessions supported by other occasional guest experts may be held in other languages.

Grading Rules

() The evaluation calendar and grading rules will be approved before the start of the course.*

The grade for the subject is obtained from the continuous assessment grades. Continuous assessment consists of doing different activities, both individual and group, of an additive and formative nature, carried out during the course (inside the classroom and outside of it). The evaluation tests consist of carrying out some practical work, in groups, which have a value of 50% of the final grade and an individual exam that has a value of 50%. The realization and delivery in time and form of the practical works is an essential condition to pass the subject.

Test Rules

Failure to perform a continuous assessment activity (assignment) in the scheduled period will result in a mark of zero in that activity.

Office Hours

Appointments will be done with the teachers of the subject
